Turtle Dove

Graphs are available for the UK, individual countries and English regions.

It is possible to calculate trends for English regions due to the high level of coverage and therefore, larger sample size for many species. Unfortunately, this is not possible for Scotland, Wales or

On each graph, the dark green line is the smoothed trend, the green dots are the unsmoothed trend, and the pale green line is the upper and lower 85% confidence limits of the smoothed trend.

Select a species and area to view a graph. You can compare two trends for the same species in different areas (UK, Country, English Region) at a time.

Select the menu icon (three horizontal bars in the top right of the graph area) to view export / download options for the graph data.

These graphs may be reproduced, subject to the appropriate acknowledgement of the BTO/JNCC/RSPB Breeding Bird Survey. Spreadsheets containing the data points for each graph may be obtained by submitting a [Data Request Form](#).

Key for English regions

Region	Counties
North West England	Cheshire, Cumbria, Lancashire, Greater Manchester, Merseyside
North East England	Cleveland, County Durham, Northumberland
Yorkshire and Humber	East Yorkshire, North Lincolnshire, North Yorkshire, South Yorkshire, West Yorkshire
East Midlands	Derbyshire, Northamptonshire, Leicestershire & Rutland, Lincolnshire, Nottinghamshire
East England	Bedfordshire, Cambridgeshire, Essex, Hertfordshire, Norfolk, Suffolk
West Midlands	Birmingham, Herefordshire, Shropshire, Staffordshire, Warwickshire, Worcestershire
South East England	Berkshire, Buckinghamshire, Hampshire, Isle of Wight, Kent, Oxfordshire, Surrey, Sussex

South West
England

Avon, Cornwall, Devon, Dorset, Gloucestershire, Somerset, Wiltshire

London

Greater London
