Population trend graphs

Species

Yellowhammer

Country / Region

England

Second Country / Region

South East England

BBS index for England and South East England 1994-2013

Yellowhammer

Graphs are available for the UK, individual countries and English regions.

It is possible to calculate trends for English regions due to the high level of coverage and therefore, larger sample size for many species. Unfortunately, this is not possible for Scotland, Wales or Northern Ireland at present. The counties contributing to each region are displayed in the table below.

On each graph, the dark green line is the smoothed trend, the green dots are the unsmoothed trend, and the pale green line is the upper and lower 85% confidence limits of the smoothed trend.

Select a species and area to view a graph. You can compare two trends for the same species in different areas (UK, Country, English Region) at a time.

Select the menu icon (three horizontal bars in the top right of the graph area) to view export / download options for the graph data.

These graphs may be reproduced, subject to the appropriate acknowledgement of the BTO/JNCC/RSPB Breeding Bird Survey. Spreadsheets containing the data points for each graph may be obtained by submitting a [Data Request Form](#).

Key for English regions

Region	Counties
North West England	Cheshire, Cumbria, Lancashire, Greater Manchester, Merseyside
North East England	Cleveland, County Durham, Northumberland
Yorkshire and Humber	East Yorkshire, North Lincolnshire, North Yorkshire, South Yorkshire, West Yorkshire
East Midlands	Derbyshire, Northamptonshire, Leicestershire & Rutland, Lincolnshire, Nottinghamshire
East England	Bedfordshire, Cambridgeshire, Essex, Hertfordshire, Norfolk, Suffolk
West Midlands	Birmingham, Herefordshire, Shropshire, Staffordshire, Warwickshire, Worcestershire
South East England	Berkshire, Buckinghamshire, Hampshire, Isle of Wight, Kent, Oxfordshire, Surrey, Sussex
South West England	Avon, Cornwall, Devon, Dorset, Gloucestershire, Somerset, Wiltshire
London	Greater London

BBS population tables

Visit the [Population trend tables](#) page to view the latest BBS trends for the UK as a whole, England, Scotland, Wales, Northern Ireland and region-specific graphs, produced for nine English Government Office Regions.

Biodiversity loss and the UK's birds

Biodiversity loss is one of the biggest drivers of bird population declines in the UK. Learn what we're doing to tackle this threat to nature and how you can support our work.

BirdTrack migration blog – early spring

It may still feel like winter but for some species, the increasing temperatures and lengthening days have already kick-started spring migration, with birds starting to arrive and depart across Britain and Ireland.
